

Skid Steer Power Rake

Turn tough terrain into perfectly prepped ground with a machine built for performance and versatility. With hydraulic angling control, operators can easily adjust the rake on the fly, guiding debris into neat rows for fast, efficient cleanup. Its consistent milling action ensures a flawless, fine-grade finish - creating the perfect seedbed for optimal germination and lush, healthy growth. Need to over-seed or do a light touch-up? No problem. The dual independently adjustable gauge wheels allow for precise skim passes that get the job done without disturbing existing turf. When it comes to tight spaces, the two-position winged end plates let you rake right up to sidewalks and foundations - no more hand work at the edges. Whether you're prepping soil, clearing debris, or over-seeding, this power rake delivers the control, efficiency, and professional-grade results you need to get the job done right.
